Web Portfolio - branden.vercel.app 

I've been passionately immersed in the world of front-end development since early 2019, constantly striving to expand my skills and stay up to date with the latest industry trends. Throughout my journey, I've had the privilege to collaborate with a diverse range of clients, including both corporations and smaller creative digital agencies.

CSS is my trusted companion in this realm. I thrive on the process of transforming intricate designs into clean and structured stylesheets. From tackling complex layouts to meticulously bringing a designer's vision to life, I find joy in the art of crafting visually appealing and user-friendly web experiences.

Work Experience

SafeCode

Front-end Web Developer

Melbourne CBD, VIC
Sept. 2022 – Present

SafeCode, a LeasePLUS subsidiary, creates novated leasing and salary packaging interfaces for individuals and businesses. With 100,000+ users, they cater to diverse clients across Australia.

- Worked on proprietary leasing/salary packaging software for LeasePlus Group
- Produced clean, structured, organised front-end code
- Management of all LeasePlus group's websites/portals (over 5+)

Arcadian Digital

Junior Front-end Web Developer

Melbourne CBD, VIC
Sept. 2019 – Feb. 2020

As a bespoke digital and marketing agency, Arcadian deliver tailored solutions to organisations of all sizes. I worked with extremely talented engineers during my time there.

- Collaborative work with project managers and lead/senior developers
- Build and structure WordPress child themes
- Build and maintain company's own WordPress plugins and themes

Bebble Media

Junior Front-end Web Developer

North Laverton, VIC
May. 2018 – Jun. 2019

A small digital agency in West Melbourne with in-house designers and developers. Specialising in WordPress, they assist small business owners in expanding their e-commerce and online presence.

- Collaborate with web/graphic designers to reach mockup standards
- Integrations of plugins + customisation of plugins to suit client's specifics
- Manipulation of software styles (i.e plugins, themes) exact to design mockups
